## ABOUT ME

As a passionate developer, I am driven by the challenge of creating innovative programs that solve complex problems and enhance user experiences. My journey in software development is fueled by a desire to push the boundaries of what's possible, constantly exploring new technologies and methodologies to deliver cutting-edge solutions. I enjoy working with diverse teams to bring fresh perspectives and drive projects to successful completion.

## EDUCATION

2022 - 2026\*

**Saranathan College of Engineering**

**B.Tech Computer Science and Business System**

CGPA - 8.70 (Current)

2022

**St. Little Flower Matric Hr Sec School**

**HSC**

Percentage - 83.5%

## EXPERIENCE

July 2024 - Aug 2024

**Cognifyz Technologies**

**Data Science Online Intern**

- The project involves comprehensive data analysis, feature engineering and predictive modeling tasks aimed at understanding and predicting restaurant ratings.
- It involves several analysis like descriptive analysis, geospatial analysis, price range analysis and customer preference analysis

Aug 2024 - 1 week

**Dovyo Technologies**

**Business Intelligence Intern**

- This experience has been incredibly enriching, allowing me to deepen my understanding of customer relationship management systems(CRM) and their role in driving business success.
- My role involved hands-on work with customer lead capture, support functions, payment processes, sales report, credit notes, estimations, and proposals.
